

Weed Management

What is happening now

- Cost of weedspraying
- Specification
- Map of areas being sprayed

What is needed

- Arguments for and against weed control (this might not be consistent across the parish)
- Alternative methods of weed control
 - Materials that can be used
 - Equipment needed and costs
 - Estimate of time taken to carry out the task (if at all possible)
 - Assessment of effectiveness if this form of control
- Conclusions and recommendations

Issues

That there should agreement between councillors for any changes

This will form part of the consultation on reviewing the specification for any new ground maintenance contract, taking place during autumn 2021

May be part of a wider action plan coming out of any recommendations of the Climate Change Working Group
